"CHALLENGES MAKE US STRONGER" - THE CIS WAY OF LIVING & MAKING IT POSSIBLE!

The global pandemic saw us face one of the worst hazards in human history, and has thrust that lesson home for all the businesses. It has also taught us many other important lessons - the ways to work and adapt to the new normal. The global IT industry was one of the first to embrace this change and adapt to it. The CIS group, one of the technology providers in the country, has well-audited and flexible practices that have helped it weather the storm.

The management of well-being of employees is essential to make any organization successful. CIS in particular has worked hard to ensure the mental and physical well-being of their employees. This focus on well-being is now becoming a differentiator in the demanding IT industry.

CIS is aggressively working on plans and strategizing that should be more relevant as per the changed market dynamics - from infrastructure, to managed services, to enterprise communication platforms, and alternate opportunities that translate to the transformed state of global economic order. We see our choices in this new normal far beyond them, and are trying to bounce back in this new phase. And the company’s consistent performance, and people-driven actions made such decisions and their evolutions more likely and effective.

IMPACT OF COVID-19 ON IT SECTOR

The whole world has been grappling with the COVID-19 situation the whole globe over, with all companies being forced to adopt remote working practices. CIS has a large team of 1000+ staff working from home in 5 affected global locations and teams have to work with the avant-garde technologies to transform their ways of working while maintaining the standards.

The impact of this crisis is being felt across all sectors including the IT industry in the country. The group is working hard to ensure the health and well-being of its employees and customers while respecting their employees. The group has been able to adapt to this new normal in every way possible.

Many of the global companies that are struggling to hold on to their employees are now facing an unprecedented challenge due to the economic downturn. CIS has well-audited and flexible practices that have helped it weather the storm. The company has taken up the remote working structure in its various operations, which has helped it to keep its employees safe, while allowing them to work from home.

CIS has a clear understanding of the importance of employee safety during these unprecedented times. It has established a clear understanding of the importance of employee safety during these unprecedented times. It has established a medical professional or the local Municipality's COVID-19 information line for advice and strike it big overcoming the ensuing opportunities that lie ahead. It is a prime example of what believing in your abilities can do.

CIS knows the market pulse. There's a lot of disruption and online behavior on the verge of re-shaping the world. CIS has worked with people and businesses more relevant as per the changed market dynamics - from infrastructure, to managed services, to enterprise communication platforms, and alternate opportunities that translate to the transformed state of global economic order. We see our choices in this new normal far beyond them, and are trying to bounce back in this new phase. And the company’s consistent performance, and people-driven actions made such decisions and their evolutions more likely and effective.
