

Convenient online mobile  
recharge services

## Customer Overview

---

### Convenient online mobile recharge services

This online application provides an optimized and cost-effective solution for mobile recharge. It serves as an online mobile recharge shop where one can easily top up mobile phones anytime for friends and family. It works with over 360 carriers.

### Project Features

- Mobile recharge for friends and family all over the world.
- Optimized security feature (Block by IP, Email and Credit card).
- Three Payment Gateway Implementation(Coinbase, Paypal, Braintree).
- Fraud detection API for IP address.

OUR CORE VALUES: PASTA - P = Passion, A = Appreciation, S = Simplicity, T = Trust, A = Accountability

## Problem Statement

An application was required that could provision mobile recharge with multiple payment options. The application should have mechanism to effectively deal with the fraud issues faced by the mobile recharge industry.

## CIS Solution

After thorough analysis of client business requirements, we developed code (i.e. made a Ruby Gem) to use TransferTo API, Braintree Integration, SMS alert API and Coinbase.

## Challenges During Implementation

Maintaining three payment gateways on single page (Coinbase, Paypal, Braintree) was a bit challenging.

## Positive Outcome

Currently the application has around 2000 customers and the total recharge amount done via this website has reached around \$10000.

OUR CORE VALUES: PASTA - P = Passion, A = Appreciation, S = Simplicity, T = Trust, A = Accountability
