

Leading Parcel Delivery Company

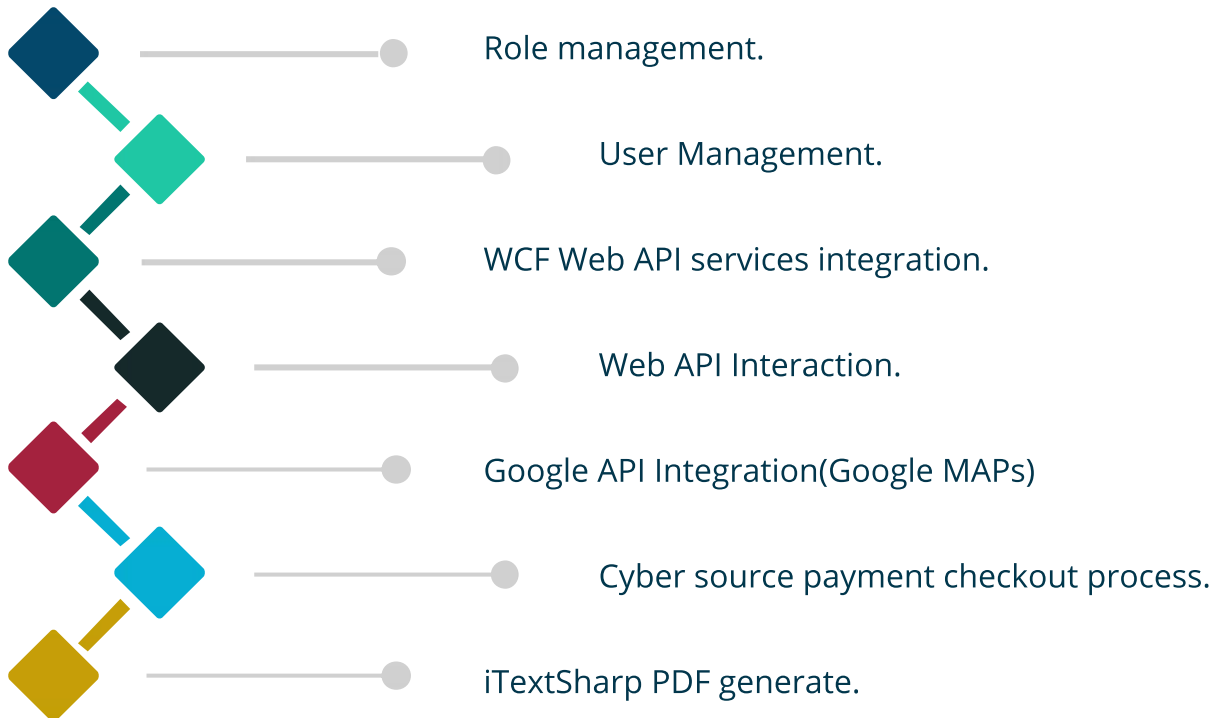

Customer Overview

Leading Parcel Delivery Company

This client is a leading parcel delivery expert with coverage area extending across Australia. Client offers both international and domestic parcel delivery services.

Project Features

This online application has various modules:-

OUR CORE VALUES: PASTA - P = Passion, A = Appreciation, S = Simplicity, T = Trust, A = Accountability

Problem Statement

Client already had an existing Joomla site. They wanted to redevelop their complete website from scratch. They wanted some of the functionality remaining the same as in existing live site and addition of some key features. They needed completely new look and feel of website with responsiveness, reliability, customer-oriented and security qualities.

CIS Solution

Complex User Management

There are basically 3 types of users who interact with the website - Account customer, Registered user and Unregistered user. All customers can send consignments world wide using the application. Users can access the functionalities of send consignment, track consignment, request re-delivery of consignment, quote consignment, pay for consignment and manage consignments. Other key modules are Coupon Calculator used for calculating coupons for parcels and book pickup used by prepaid users to book consignments and selection of delivery points. The application also has rich admin panel and registration modules.

Challenges While Implementation

We followed Agile process and module distribution methodology.
We applied various techniques for performance improvement.
We used solid design pattern for programming and integrated unit testing for the project.

Positive Outcome

We analyzed client's requirement and business need and based on this analysis we created modules with our internal expert team and senior software developers. These modules have helped the website become more successful.

OUR CORE VALUES: PASTA - P = Passion, A = Appreciation, S = Simplicity, T = Trust, A = Accountability
