

CUSTOMER OVERVIEW

ONLINE DIAGNOSING PLATFORM AND HEALTH RECORDS MANAGEMENT

This is an online diagnosing platform helping people to find current diagnosis by making use of the wisdom of the crowd. User can explain his problem and submit it for review by other so-called diagnosers who then contemplate the problem and come up with possible diagnoses. The diagnosers are rewarded with points for effort and results. The web application also provides facility using which people can keep their medical information secure and accessible in one place.

PROJECT FEATURES

BELOW ARE THE KEY FEATURES OF THE WEB APPLICATION:-

- ◆ **Patient can create their own health records and manage their health**
- ◆ **Substitute Management: This software manages all school employee absences online. The software allows for the substitutes to be assigned to these days.**
- ◆ **Admin moderates the health records and other data for authenticity of content and makes required changes in comments before publishing.**
- ◆ **Separate moderator panel where moderator can see all the front end site activity.**

PROBLEM STATEMENT

The operational costs associated with maintaining paper documents are huge. For contracts, legal documents or agreements, conventional paper-bound methods are used that require lot of time, space and money. CIS intended to create a product that solves this problem with efficient e-signatures that are quick to make and share. The aim was to change the signing experience with digital method that is completely secure and safe.

POSITIVE OUTCOME

Esignly has enabled business operations to become streamlined, prompt and secure. The product is suitable for use in a variety of industries like finance, insurance, healthcare, government, banking, real estate and legal department.
